EXPLODING CRYSTALS

Custom Flavors and Additives Available

Exploding Crystals are a unique way to enjoy hemp distillate. These snapping candies are one of the most effective ways to take hemp distillate. The carbonated sugar rocks are coated with hemp distillate that absorbs in the mouth sublingually. This contrasts with other edibles that require digestion in the stomach before the hemp distillate is released into the bloodstream. Each tube of Exploding Crystals has a single serving concentration of hemp distillate in a wide variety of fresh flavors. All of our products are Third party tested by a DEA Certified Lab. We offer customization of flavors, strengths, packaging, and cannabinoids, if you are looking for something out of the ordinary. MOQ's apply for any nonstandard formulation, flavor, strength, additive, or packaging.
